**22ART06: Watercolours for Beginners and Advanced**

**Dates: 11/02/2022 - 25/11/2022**

**Location: Glenhuntly Art Room 1151 Glenhuntly Road**

This course is suitable for beginners and more advanced students. Please bring the following: - Drawing pad, 2B pencils, eraser, and pencil sharpener. - Three round watercolour brushes: small, medium and large. Need to be of reasonable quality. -

Watercolour paint can be in pans or tubes. Suggested brands: Winsor & Newton, Art Spectrum, Royal Talens or Cotman. -

Essential colours: Ultramarine blue, Cadmium Yellow and Vermillion red; also, raw and burnt Sienna. Optional colours: Cerulean blue, Lemon yellow, Rose madder, Payne's Grey and Sap green permanent. - An old white plate or palette for mixing colours and a cloth or towel for cleaning and drying. A jar for water, and paper towels come in handy.

Unfortunately, art materials are not cheap but with inferior quality materials it is impossible to produce quality work and the good thing is, after the initial outlay, you will have many years of enjoyment from your first purchase. I still paint quite often and now my expenses are less than the cost of a cup of coffee per week.

**Location: ZOOM ONLY**

What makes a scripture sacred? How are religious writings intended to function? What do they add to their adherents' understanding of life? This course will look at examples of sacred scriptures from across the world's major religions. We'll be interested to explore what they say but also how they are read and used within religious traditions. These questions will hopefully help us gain insights into the workings of religion through the writings that religious people treasure.

A curiosity about religion and society. Fred Morgan taught religious studies, specialising in the religions of India, at the University of Bristol in the UK before becoming a rabbi. He has been involved in interfaith dialogue for many years, most recently at the Australian Catholic University and with the Council for Christians and Jews.

**Tutor: Andrew Rooke**

We look at the great questions of life as reflected in the religions and philosophies of the world along with the latest scientific discoveries. We have a wide variety of lecturers from many philosophical and religious backgrounds giving their perspectives on the great philosophical and scientific questions of the ages. Issues such as: the purpose of life; the existence of divinity; what possibly happens after death; karma and reincarnation; past life regression; psychic powers; spiritual evolution and the hidden history of mankind; spiritual initiation; the masters of wisdom; the nature of the self; how the One becomes the Many; meditation; astronomy and astrology; the history of philosophy and science, and many other related subjects. We also examine in detail the world's great religions and some of the lesser-known religions and philosophies using PowerPoint, videos, meditations, and music from many lands and traditions. We present a wide variety of views and leave it up to class members to make up their own minds.

There are no academic prerequisites or requirements of any kind for this course - except - to have an open mind and willingness to discuss ideas without prejudice. The course is coordinated and most of the lectures are given by Andrew Rooke, former Chief Librarian of Monash Health with BA (Hons) specializing in Buddhism in China and Master of Librarianship specializing in the development of libraries in developing countries, especially Africa. Andrew spent many years working in Australia, Africa and the USA in university and medial libraries. He is the National Secretary of the Theosophical Society Pasadena in Australasia and draws on the expertise of members of the Theosophical Society and other spiritual and religious organizations in Australia and around the world for our lectures. Andrew is the author of many journal articles and the editor of books on spiritual subjects and librarianship. He is the founding editor of the online magazine, Theosophy Downunder, which is available to all members of the course who would like to receive it four times per year. Members of the course can also borrow from the Theosophical Library in Glenhuntly Rd., Caulfield, when COVID restrictions allow us to open.

The second five sessions concern identifying what actions can reduce climate change, what actions will help us adapt to the changing climate and how climate change fits into the framework of global sustainability.

Requirements: a curiosity and interest in pursuing this subject, no requirement for formal education in science. The sessions will be roughly half presentation of material and half discussion. Ian Galbally has worked in atmospheric science for CSIRO for over 50 years. He has had the good fortune to be involved in projects such as the Baseline Air Pollution Monitoring Station at Cape Grim Tasmania, Australia's National Greenhouse Gas Inventory and within the Intergovernmental Panel on Climate Change (IPCC) developing international guidelines for countries to report their national greenhouse gas emissions. **Dates: 07/02/2022 - 25/11/2022**

**Location: Various Bike Tracks**

I am calling this a bike group as compared to a cycling group because it is intended for those looking for some pleasant outdoor exercise. Participants need to be reasonably fit and competent on a bike, however it is not a race; we are not the Bay Rd Peloton! Most rides will be on the off-road bike paths that can be accessed from Glenhuntly, however on occasion we may use the train system to access routes further afield such as the Merri Creek, Moonee Ponds Creek and Diamond Creek-Yarra Trail (All activities will be run in accordance with prevailing Covid-19 restrictions, assuming that they have been relaxed and it is permissible and safe to do so)

Participants should feel comfortable riding a bike and understand that for most rides they will be in the saddle for at least two to three hours. Participants need to have a well-maintained bike. Local bike stores will be able to assess and assist you if you are unsure about the appropriateness of your bike. Also be sure to carry a MyKi card with sufficient credit. Please also carry a spare tube for your bike. While we will be able to assist you if you have a flat, a spare tube that fits your bike, will make getting back on the road much quicker.

I will not be able to answer all your questions, and when I don't know something, I will say so. But I have a pretty good idea of correct pronunciation, and I have also picked up some good tips along the way that native speakers may not be aware of because they learned the language 'by ear' as they were growing up, and not as a 'foreign language' with grammar and rules.
